

FIRE RISK ASSESSMENT

REGULATORY REFORM (FIRE Safety) order 2005

Responsible Person (Employer or other person having control of the premises)	Norma Corkish, Chair of Trustees				
Address and contact number of Premises		130 Up Farnha Surrey			
Postcode		GU9 0			
Fire Authority Premise ID					
(Available from Fire & Rescue Authority)					
Assessor: Melissa Salisbury, Centre Manager					
Date of Fire Risk Assessment 3/11/2015					
		5/11/20	515		
The purpose of this report is to provide an assessment of the risk to life from fire in the building and where appropriate to make recommendations to ensure compliance with fire safety legislation. It is based on a visual survey and information supplied by the organisation. No physical testing of equipment or systems was undertaken. This Fire Risk Assessment should be reviewed by a competent person annually or at such an earlier time as there is reason to suspect that it is no longer valid or there have been significant changes.					
(This risk assessment should be reviewed annually or at such an earlier time as there is reason to suspect that it is no longer valid or there has been a significant change in the matters to which it relates.)

General Information

THE PREMISES	
Number of floors in building:	One
Approximate floor area: (m ²)	Approximately 239.51 m2
	· · · · · · · · · · · · · · · · · · ·
Brief details of construction: (Date of construction, brick, timber, purpose built or converted)	A purpose built community centre built in 2009 from brick and timber.
Primary usage: (eg Hotel, Shop)	Community centre – hired out to user groups
Secondary usage: (eg Kitchen, Bar, Function Room, Offices)	Offices

OCCUPANCY PROFILE					
Maximum number of persons in the most	WEEKDAYS	3	WEEKENDS	S	
highly occupied compartment to be affected	0000 to 0400	0	0000 to 0400	0

NHS)

Fire Loss Experience:	None recorded or known
Assessed Risk Category:	Normal

IDENTIFICATION OF FIRE HAZARDS

SOURCES OF IGNITION

Ignition source identified	Evaluation of Risk	Existing Control Measures	Additional Control Measures Required
Smokers (cigarettes etc)	Although smoking is prohibited in the building and grounds there is a possibility that some may ignore this and smoke close to the building. Carelessly discarded or improperly extinguished cigarettes could start a fire.	Signs around the building. Bin outside front door	
Electrical equipment General equipment throughout the building including vacuum cleaner and floor polisher in cleaning cupboard	Worn, damaged to untested electrical equipment or wiring could start a fire.	Visual inspection is carried out regularly to check for defects. The PAT test is carried out annually by a competent person. Electrical system checked periodically by a registered electrician	
Arson/vandalism	Possibility of deliberate ignition.	All combustible materials are removed from premises. Bins are emptied regularly. Lighting is provided for illumination of outside areas. Solar lighting added to areas used by evening users.	
Heating boiler	Electrical faults could cause fire.	Gas safe test conducted regularly along with servicing by registered person.	

File: HCC – Fire Risk Assessment V2024

		Boiler is situated in cleaning cupboard with fire door.	
Cooking – Ovens, hob, microwave, kettle	Users could leave hob/oven unattended and could start a fire. Worn or damaged equipment could start a fire.	PAT testing is carried out annually by registered persons. Equipment inspected periodically to ensure that it is free from damage and excessive wear, and is clean and in good working order.	

ELECTRICAL SOURCES OF IGNITION	
Measures taken to prevent fires of electrical origin.	
Fixed installation periodically inspected and tested? (Every 5 years)	YES
Portable appliance testing carried out on a risk assessed basis?	YES
Suitable policy in place regarding the use of personal electrical appliances?	YES
Suitable limitation and management of trailing leads and adaptors?	YES
SMOKING	
Measures taken to prevent fires as a result of smoking.	
Smoking prohibited in the building?	YES
Smoking permitted in appropriate areas?	YES
Suitable arrangements for those who wish to smoke?	YES
PORTABLE HEATERS	
Portable heaters are used within the premises.	
	YES
Is the use of the more hazardous type (ie radiant bar fires or LPG appliances) avoided?	YES
Are suitable measures taken to minimise the hazard of ignition of combustible	YES
materials due to these heaters?	
FIXED HEATING INSTALLATIONS	
Fixed heating installations such as boilers are used within the premises.	
	YES
Are fixed heating installations subject to regular maintenance?	YES
Are suitable measures taken to minimise the hazard of ignition of combustible	YES
materials due to these heaters?	
COOKING	
Measures taken to prevent fires as a result of cooking.	
Filters cleaned or changed and ductwork cleaned regularly?	N/A
Suitable extinguishing appliances available? (e.g. Fire blanket, Wet Chemical etc)	YES
Suitable Shut Down Procedures in place?	N/A

SOURCES OF FUEL

File: HCC – Fire Risk Assessment V2024

Combustible source identified	Evaluation of Risk	Existing Control Measures	Additional Control Measures Required
Cleaning chemicals	Chemicals and cleaning supplies stored next to the boiler.	Fire door on cupboard to control spread. Metal Cabinet used to store supplies to reduce risk of combustion.	
Wooden tables, furniture, various boxed items kept in cupboards, blinds throughout building	Combustible materials could assist in starting/spreading fire. Furniture etc could become ignited and start or aid the spread of fire.	Combustible materials are kept in their designated areas and clutter avoided where possible. Waste materials kept to minimal and regularly managed.	

IDENTIFICATION OF PEOPLE AT RISK

People at risk	Evaluation of Risk	Existing Control Measures	Additional Control Measures Required
People who use the premises	Fire could block means of escape via the main entrance. People could misuse equipment and start a fire.	Many escape routes – most rooms have at least two. Clear signage to indicate escape routes with emergency lighting. Fire evacuation procedure is gone through with each user group in detail and instructions given in writing in hirers agreement. Hirers agreement explains how to call the fire brigade in case of fire. Emergency evacuation plans in each room and updated regularly. Safety Visits from Surrey Fire & Rescue.	
People with disabilities or special needs, vulnerable adults or children.	Mobility issues may hinder evacuation. Sight or hearing problems could affect identifying alarms.	All groups are responsible for their own users.	Look at removing the door threshold on exit doors to make them more wheelchair friendly.

HAZARDS INTRODUCED BY CONTRACTORS AND BUILDING WORKS

File: HCC – Fire Risk Assessment V2024

Fire safety conditions have been imposed on both external contractors and in-house maintenance staff?	YES
Is there satisfactory control over works including use of hot-work permits, where appropriate, carried out in the building by external contractors?	YES
Give details: Contractors are requested to show any permits before work commences.	

EVACUATION STRATEGY

SINGLE STAGE EVACUATION

YES

It is reasonably expected that all relevant persons in the premises are able to (and will) evacuate immediately to a place of safety.

Written copies of Evacuation Procedures are located as follows: In the Main Hall, Lounge, Training Room, Fridge & Cupboard, Office, Consulting Room, Kitchen and Reception area.

MEANS OF ESCAPE	
It is considered that the premises are provided with reasonable means of escape	YES
in case of fire.	
Adequate design of escape routes.	YES
Reasonable distances of travel when:	-
Where there is escape in a single direction?	YES
When alternative means of escape are used?	YES
Suitable protection of escape routes (Fire resisting construction)?	YES
Adequate provision of exits?	YES
Exits easily and immediately open-able where necessary?	YES
Escape routes unobstructed?	YES
It is considered that the premises are provided with reasonable arrangements for	YES
means of escape for disabled people?	
MEASURES TO LIMIT FIRE SPREAD AND DEVELOPMENT	_
It is considered that there is:	
Compartmentation of a reasonable standard. (Fire resisting)	YES
Compartmentation of a reasonable standard. (File resisting)	TES
Reasonable limitation of linings that may promote fire spread. (Walls and ceilings)	YES
Reasonable infination of infings that may promote me spread. (Wais and cenings)	
As far as can be reasonably ascertained, fire dampers are provided in ducts or	YES
vents as necessary to protect critical means of escape routes against passage of	
fire, smoke and combustion products in the early stages of a fire?	
EMERGENCY ESCAPE LIGHTING	
	YES
Is it considered that there is a reasonable standard of normal, artificial and/or	153
emergency escape lighting to ensure safe use of escape routes?

	1		
FIRE SAFETY SIGNS AND NOTICES			
Is it considered that there is a reasonable standard of fire safety signs and notices? This includes fire exit, fire resisting door and hazard signage.			
MEANS OF GIVING WARNING IN CASE OF FIRE			
Reasonable manually operated fire warning system provided?	YES		
If yes give details: (e.g. Break glass call points, fire bell, air horn, klaxon etc) Break glass points, fire alarm			
Automatic fire datastics provided?	VEO		
Automatic fire detection provided? If yes, to what Standard? (e.g. BS 5839 Part 1 Grade L1/L2 etc)	YES		
Throughout Premises	YES		
Extent of automatic fire detection generally appropriate for the occupancy and fire	YES		
risk?	NO		
Remote transmission of alarm signals to a monitoring station or other? FIRE EXTINGUISHERS	NO		
	1/50		
Reasonable provision of portable fire extinguishers?	YES		
Are all fire extinguishing appliances readily accessible and unobstructed?	YES		
(i.e. mounted on walls or on appropriate bases)			
Is suitable wall signage provided relevant to the extinguisher?	YES		
Are hose reels provided?	NO		
Deficiencies and Comments: Having assessed the building, we have two fire extinguisher positions towards either of the building, so that having checked the panel the location of the fire can be identi One further extinguisher in the kitchen with two fire blankets.			

MANAGEMENT OF FIRE SAFETY

PROCEDURES AND ARRANGEMENTS	-
Fire safety is managed by:	Board of Trustees
Deputy or assistant:	Melissa Salisbury
Are competent person(s) appointed to assist in undertaking the preventative and protective measures (i.e. relevant general fire precautions)?	YES
State name and responsible element of fire safety	120
Melissa Salisbury Fire training, testing, maintenance	
Is there a suitable record of the fire safety arrangements?	YES
Appropriate fire procedures in place?	YES

File: HCC – Fire Risk Assessment V2024

Are procedures in the event of a fire appropriate and properly documented?		
	YES	
Are there suitable arrangements for summoning the Fire and Rescue Service?	YES	
Are there suitable arrangements to meet the F&RS on arrival and provide relevant information, including that relating to hazards to firefighters?	YES	
Is there a plan of the building available indicating basic layout and any areas of significant risk?.	YES	
Are there suitable arrangements for ensuring that the premises have been evacuated?	YES	
Is there a suitable fire assembly point(s)?	YES	
Are there adequate procedures for evacuation of any disabled people who are likely to be present?	YES	
Persons nominated and trained to assist with evacuation, Including evacuation of disabled people?	YES	
Appropriate liaison (if necessary) with Fire and Rescue Service Rescue Service crews visiting for familiarisation visits?	N/A	
Routine in-house inspections of fire precautions (e.g. in the course of health and safety inspections)?	YES	
Deficiencies and Comments:		
TESTING AND MAINTENANCE		
Testing and Maintenance is managed by:	Sue Connolly Assistant Manager	
Deputy or assistant :	Isabel Gunn Assistant Administrator	
Adequate maintenance of the workplace?	YES	
Weekly testing and periodic servicing of fire detection and alarm	YES	
system to include ancillary equipment (e.g. door hold open devices, door locks etc)		
Monthly and annual testing routines for emergency escape lighting?	YES	
Annual maintenance of fire extinguishing appliances?	YES	
Periodic inspection of external escape staircases and gangways?	YES	
Six monthly inspections and annual testing of rising mains?	N/A	
Weekly and monthly testing, six monthly inspections and annual testing of fire fighting lifts?	N/A	
Weekly testing and periodic inspection of sprinkler installations?	N/A	
Routine checks of final exit doors and/or security fastenings?	YES	
Annual inspection and testing of lightning protection systems?	YES	
Other relevant inspections or tests:	YES	
Give details: Business safe and well visit with Surrey Fire & Rescue		
Deficiencies and Comments:		
Regular testing of fire detection and alarm systems carried out TRAINING AND DRILLS		
Regular testing of fire detection and alarm systems carried out TRAINING AND DRILLS		
	Melissa Salisbury, Centre Manager
